to your screens and mirrors. Glass Solution saves a lot of time!*

Glass Solutions

A glass surface may seem shiny and perfectly smooth. But when studied through a microscope, it looks more like a moonscape, with little mountains and craters. This is the reason glass can get really dirty and hard to clean.

Newly placed glass is clear and easy to clean. But especially when applied in bathrooms, glass is subject to soap, grease, chalk etc. These contaminants fill the cavities in the glass and react chemically with the glass, this results in stains and discolouring in the glass.

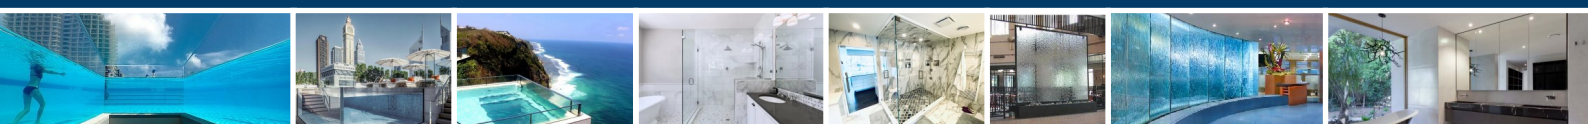

Once the pollution is stuck tightly into the pores of the glass, corrosion amplifies the problem. In a matter of weeks it will damage your glass, causing poor clarity.

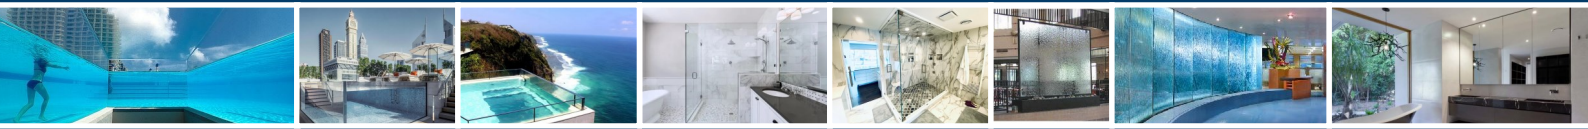

Your brilliant new glass can only be cleaned with hard labour & much time of your staff, is not good for your glass and has only a short time result.

Or you can replace your panes every few years. What do you prefer?

We advise Glass Solutions[®]

***Bring down your cleaning effort
with 80%***

Glass Solutions

Glass Solution offers an amour against glass contamination resulting in stains, low clarity.

It can be applied at window panes, shower doors, mirrors and separation glass, inside and outside.

The method is based on thorough deep cleaning of the glass, renovation if necessary and application of Glass Protector. All this being done by trained and skilled hands. The products we use are environment-friendly, non-aggressive and powerful.

Glass Protector – like fluid glass – fills the holes and pores of the glass resulting in a smooth, invisible layer that protects your glass and repels dirt. This layer is a permanent amour and keeps your glass clean and bright.

For interior glass this is a permanent solution.

For exterior glass we advise you to apply Glass Protector every three to five years, depending on the general degradation.

After the application of Glass Protector maintenance is an easy job. You will find that maintenance-time will drop back as to 20 percent of the time you and your staff spend now. Think about what you can do with all that time!

Glass Solution is a concept developed in close cooperation with the very best Dutch specialists in surface renovation.

The products have been successfully used for decades in prestigious hotels, superyachts and buildings all over the world.

Save dramatically on time consuming cleaning and polishing. Let Hotel Safety Solutions apply a sustainable top layer to your panes and mirrors. Glass Solution saves a lot of time!
